

Parent Interview- STD's

Directions: Share with your parents what you've learned about relationships and STD's. Ask them what they learned when they were your age. Respond to all of the questions below. Each response should be a few sentences or longer. Both you and a parent must include a signature.

1. What is the difference between love and infatuation?

2. Describe what a healthy, dating relationship for a teen looks like?

3. How would you describe an acceptable date for a high school student?

4. What do you (the parent) think are the greatest risks of premarital sex? What is the best way to clearly communicate the risks of premarital sex to teenagers? Explain.

5. Abstaining from sex until marriage or a committed relationship is the only sure way to avoid the risks of sexual activity. What steps do you (the parent) think a teen must take to accomplish a goal of abstaining until a committed relationship? Who would he/she need support from? In what ways would he/she benefit from making a decision like this?
