

**Hello families!**

**As you know, we have been working on multiplication and division in math. Extra practice is vital, because they need to build fluency with these facts. I put together some electronic resources that you can use with your children at your convenience, if you find they are needing fact practice. I chose games that I saw appropriate and fun! Hopefully everyone enjoys and benefits from these resources! Of course good old fashioned flashcards, written practice, and/or oral practice are great options too!**

**Thank you for your support,**
