Greatest Common Factor

BEFORE

Now

WHY?

You found all the factors of a whole number.

You'll find the GCF of two or more whole numbers.

So you can organize bands at a music camp, as in Ex. 32.

A **common factor** is a whole number that is a factor of two or more nonzero whole numbers. The greatest of the common factors is the **greatest common factor (GCF)**.

Relatively Prime Two or more numbers are **relatively prime** if their greatest common factor is 1.

Practice A

For use with pages 179-183

1. Name two common factors (other than 1) of the numbers 18 and 24.
2. Give an example of two composite numbers that are relatively prime.

ex: 3, 6
ex 4, 15

Find the greatest common factor of the numbers.

3. 8, 24

4. 7, 35

5. 14, 21

9. 16, 36

10. 36, 90

11. 42, 98

Find the greatest common factor of the numbers. Then tell whether the numbers are relatively prime.
